

Dear Editor,

I would like to sincerely thank you and the anonymous reviewers for your careful evaluation of my manuscript entitled:

Participatory Temporal Urbanism: Reimagining Participatory Design, Place Evolution, and Sustainable Cities

(Manuscript ID: DP026270030)

I greatly appreciate the time, expertise, and constructive feedback provided during the review process. I found the reviewers' comments thoughtful, insightful, and highly valuable. Their suggestions have significantly helped me strengthen the manuscript, both conceptually and practically.

Following the recommendations of the Editor and both reviewers, I have carefully revised the manuscript throughout. In particular, I have substantially strengthened the conceptual positioning and originality of Participatory Temporal Urbanism (PTU), clarified its relationship to Participatory Temporal Design (PTD), introduced a new **Methodological Approach** section, expanded the operationalization of the five dimensions of PTU, strengthened the analytical treatment of the illustrative examples, further developed the discussions of poIr, equity, sustainability, and institutional implementation, and carefully revised the Discussion and Conclusion to better articulate the paper's theoretical contribution and future research agenda.

In addition, I have addressed all editorial comments. Specifically:

- The manuscript has been carefully revised to ensure compliance with the journal's **AMA citation style**.
- All references have been reviewed for consistency between the text and the reference list.
- All figures have been carefully checked. **Figures 1–3 are original figures prepared by the authors specifically for this manuscript.** The illustrative photographs are used under their respective open licenses (including Pixabay and Creative Commons where indicated), and the figure captions have been reviewed to ensure appropriate attribution and licensing information.
- The manuscript has undergone a comprehensive language and style revision to improve clarity, readability, consistency, and academic presentation throughout.
- **In-text citations and the reference list have been converted to AMA style throughout, per the editor's note 1; these global changes are not color-highlighted.**

In accordance with the journal's revision instructions, all substantive revisions responding to the reviewers' comments have been highlighted in the revised manuscript to facilitate the review process. A detailed point-by-point response to each reviewer comment accompanies this submission.

I believe the revised manuscript has been substantially strengthened and now addresses all major concerns raised during the review process. I sincerely hope the revised version is now suitable for publication in **Design and Planning (DP)**.

Thank you once again for your time, consideration, and the opportunity to improve my work. I very much appreciate your consideration of my revised manuscript and look forward to your decision.

Yours sincerely,
