

ACCEPTED PAPER · SUPPLEMENTARY FILE

Automated and scalable fabrication of scaffolded spheroids as building blocks for modular tissue engineering

Paper version: Accepted Paper

Accepted Papers are manuscripts accepted for publication, encompassing all changes made following the peer review process, along with a standard cover page indicating the paper version and an “Accepted Paper” watermark, but excluding any other editing, typesetting or other changes made by AccScience Publishing and/or authors post-acceptance.

Article ID: IJB025290291

Automated and scalable fabrication of scaffolded spheroids as building blocks for modular tissue engineering

Running title: Scaling up fabrication of scaffolded spheroids

Supplementary File

Supplemental Figure 1: Repeatability comparison of volumetric dispensing modes A) via microfluidic device at valve opening times of 500 ms and 2000 ms at 25 mbar and B) via a separate fluid line at valve opening times of 500 ms and 1800 ms at 50 mbar
